38th Key award.(<http://awards.mediakey.it/>) - Milan, Italy

about me

I am an animator and I have been working in the Computer Graphics field since 1994. In 2000 I opened an animation studio called cube3d (www.cube3d.eu), where I made hi-quality full CGI TV commercials, TV series and music videos.

I specialise in Character Animation but have a strong background in digital illustration. I use **Autodesk Maya**, **Adobe Photoshop**, **Adobe Illustrator**, **Adobe AfterEffects** on a daily basis.

Not only does my experience evolve the creative production of digital animation, but I have also supervised and managed a team of animators on a series of pre-school programmes called "Ondino", commissioned by RAI fiction.

Working on commercials and TV series improved greatly my organizational skills and the ability to organize my workflow in order to respect tight budgets and deadlines.
